1. Point out as many things that are either incorrect or could use improving in the graphic linked to on April 4 in the online course calendar.

2. Find another example of a statistical graphic that could be improved and explain how you would improve it. (In one way is enough for this assignment, but the more ways, the better!) Do not find such graphics from specialized data visualization blogs or sites, but rather from actual news or other informational websites (or even newspapers or magazines if you like).

3. Find an example of a good statistical graphic and explain why it is an effective communication tool. Just as for Problem 2, do not find such graphics from specialized data visualization blogs or sites, but rather from actual news or other informational websites (or even newspapers or magazines).
